~ Starting Price Map \$3270 ~

•Exclusive Designed Controls- 17 switchable pickup variations, wired in stereo with Acoustic & Electric signals splittable to separate amps and/or mixer channels.

*1 Push/Pull Master Volume & 1 Push/Pull Master Tone- w/Ebony Wood Knobs

(The Push/Pull Pots engage Coil Tapping... The bridge and neck humbucker pickups can each be split by their own push/pull switch on the volume & tone control knob to achieve a single-coil tone. This coil-tapping function allow you to instantly achieve brighter, snappier tones from the humbucker pickups, to replicate the sounds of other classic guitars equipped with single-coil pickups, and then return to the standard humbucker full, thick, warm, powerful tone at the push of a knob. The Single coil configurations are specially designed to be "hum-reducing".)

*3-Way Humbucker Pickup Selection Switch, (Mid. Position activates the Blend Pot)

*Blend Pot (Mid Position- allows Blending the Vol. of the two Humbucker Pickups)

*Master Volume for Internal Acoustic Pickups Independentl

*Kill Switch (Humbuckers only)

*Single 1/4" TRS Stereo Output Jack
